Will Lecture on Blood Transfusion

On Saturday evening, May 28th, in the Legion Hall at 8.30, Major Layton, of Calgary, will address the Canadian Legion and Boy Scouts on "Blood Transfusion."

Scouts in Calgary have taken this scheme up and had their blood tested and numbered, in case of an emergency call for a transfusion.

Major Layton is an excellent speaker and his lecture will be of unusual interest to all.

All returned men are cordially invited

Highway Delegation at Edmonton

A strong Didsbury delegation went to Edmonton on Friday to place before the government their claims that the proposed new highway should go through the town.

Hon. W. A. Fallow told the delegates that on the advice of the engineering department he had recommended to the government that the highway from Innisfail would approach Olds from the north and proceed past the Agricultural School straight south to Carstairs, which would take the road one mile east of the boundary of Didsbury and almost two miles from the centre of the town.

Mr. W. A. Austin presented the brief for Didsbury, asking that the highway come through town and proceed west of the track, following approximately the route of the present highway. He pointed out that great loss would accrue to business if the route through the town was changed.

He was supported in his argument by Messrs M. Weber, H. Hawkes, Ed Ford, N. S. Clarke, W. Davies, R. J. Barrett and C. E. Reiber.

Mayor S. A. Fox, of Innisfail, president of the Union of Alberta and Neil D. Primrose, vice-president of the union, presented the principle that the highway should touch all towns.

Mr. John Ure presented a brief, asking that the highway go through the town of Carstairs, but stated that he would not present any other argument, as if the requirements of Didsbury prevailed Carstairs would be served in due course.

The delegation was informed that the cabinet would take the matter under consideration at an early date.

The members of the cabinet who listened to the arguments were Premier Aberhart, Hon. W. A. Fallow, Hon. Dr. Cross, Hon. N. E. Tanner, Hon. D. B. Mullen and Hon. Lucien Maynard.

The following were delegates from Didsbury: Mayor Chambers, W. A. Austin, Ed. Ford, J. V. Berscht, R. J. Barrett, M. Weber, Ray Lantz, W. G. Liesemer, H. Hawkes, Bob Howie, J. E. Gooder, C. E. Reiber, W. A. McFarquhar and Dr. Clarke. N. S. Clarke and W. Davies represented the rural districts.

Government Announces Highway Route.

The claims of Didsbury have been disregarded and the new highway will go straight south from the Rosebud school, missing the town by almost two miles, it was intimated in a telephone message from E. P. Foster, M.L.A., early Tuesday morning.

The message was received with disappointment by the business men and others in town, as it was hoped that the highway would at least skirt the town.

Hon. W. A. Fallow in announcing that the route of the highway had been definitely decided upon by the cabinet, said, "The route is the one which I told the delegation I was recommending to the government."

Tracing the new route, running south from Red Deer, Mr. Fallow said that it would be one-half mile from the north boundary of Innisfail and would touch the south boundary of the town.

There was practically no change from Innisfail to Bowden, the new route linking with the present road about one-half mile east of Bowden. From Bowden to Olds the road would run alongside the railway, but joining with the old highway from the north instead of from the east as at present.

From Olds, said the minister, the road would follow a straight line to join the present highway at Carstairs, only it would run on the east instead of the west side of the track.

"The highway will miss the town of Didsbury but will be one and one-quarter miles from the east boundary of the town," said Mr. Fallow. "It will cut out a bad grade and a bad crossing of Rosebud Creek," he said.

Dealing further with the Didsbury situation Mr. Fallow pointed out that there is a main east and west highway running into the town, crossing the new north and south road one mile east of the town.

"I have issued instructions to the department to grade and gravel the connecting link so that there will be a perfectly good entry into the town from the east on an all-weather road," he said.

Empire Day May 24.

Stores and business houses will be closed all day next Tuesday, May 24th, and open all day May 25th.

Melvin School Wins Grand Challenge

Melvin School was the winner of the Grand Challenge Shield for rural schools at the Olds Inspectorate Musical Festival, competition for which was held at Olds and Three Hills, with a score of 68 points. They also won the cup in the Olds Division.

Fairview School was in second place with 61 points and won the silver cup in the Three Hills Division.

In the town school section Three Hills won the Grand Challenge with 195 against Olds with 183 points.

Will Organize Girl Guides

A meeting of the I.O.D.E. chapter will be held at the home of Mrs. C. R. Ford this Friday, May 20th, to consider the organization of a group of Girl Guides and Brownies.

Mrs. Knight, Provincial Convener of the Girl Guides, will be present and will give full information regarding organizing.

Mrs. Knight will also speak to the girls at the school.

Knox United Church Notes.

The services next Sunday will be of a special nature, featuring the 200th anniversary of the conversion of John Wesley. The hymns for the day will be selected from those composed by John Wesley, and the sermon topic will be, "The Man Who Changed a Century." All are cordially invited to attend.

Evangelical Church Notes.

The pastor will preach from the subject, "The Spiritual Basis of Security" next Sunday morning. Miss Eby will preach in the evening and also on Sunday morning, May 29th.

Three 1-Act Plays at the Knox Church Auditorium tonight (Thurs).

Successful Didsbury Student.

James Delmar Foote, of Didsbury, was successful in winning one of the awards presented at the convocation at Mount Royal College, Calgary, held on Tuesday. He was winner of the Council of Jewish Women's Bursary for the highest general standing in History and Political Economy.

Mr. Foote was also honored by being requested to give the Valedictory address at the convocation.

Relief For The Land

While ownership of land brings with it a great many privileges it also entails the assumption of responsibilities and obligations as all who own real property either in urban centres or rural districts have become well aware in recent trying depression years, even if they did not know it or were only dimly appreciative of the fact before.

Two main factors were responsible for this quickening perception of the obligation of ownership of land. One of these is the contraction of private incomes due to agricultural and economic depression and the other is increasing levies charged against the land on account of growing demands for more and more public services of a social character.

As a result of these two trends owners of real property find themselves between the jaws of a pair of pincers which are gradually closing together and threatening extinction of all owner-equity. As a result of this process the greater part, if not all, land held for speculative purposes, has passed, or is about to pass, into public ownership and a similar fate threatens a substantial percentage of land occupied as homes and even much of it utilized for productive purposes.

Measures Are Temporary

It is true that in Western Canada, at least, governments, both provincial and municipal, have taken steps to prevent immediate confiscation of property occupied by owners as homes, but these are only temporary measures and the time must inevitably come when these protective measures will have to be lifted and property owners left to fend for themselves unless some permanent solution is found.

This solution can only come by major shifts in the bases of taxation and, in the case of municipal taxation, by relieving the land of the necessity of contributing to the cost of social services, which it was never intended it should do.

It is hoped, of course, that when the Rowell Commission on Dominion-Provincial relations submits its report to the Federal Government, the recommendations will contain adequate provision for lifting from the land a burden which it is incapable of carrying. That the limit of capacity has been not only reached, but passed, is borne out by the testimony received by the commission from provincial and municipal authorities and representatives of numerous organizations, and a similar condition of affairs is evident in the east as well as the west.

Hope For Relief

Therein lies the hope that some tangible and practical solution of the problem will be reached and implemented. If the east as well as the west is staggering under an insupportable burden it is reasonable to assume that some attention will have to be paid to the problem and some steps taken to remedy the situation.

It might well be pointed out here that theoretically the guiding principles of municipal taxation are payment for services rendered and payment on the basis of ability to pay. All authorities are agreed upon this. But, services rendered to property as such should be paid for in their entirety by reality owners, while services rendered to persons as individuals should be provided for on the basis of ability to pay. When the onus of providing for social services is left on the shoulders of the municipalities, they are placed in an impossible position with the municipal tax base largely or almost entirely confined to levies on real property.

A Tremendous Increase

"With the development of the service idea of government," as was appropriately stated recently by J. J. Smith, Deputy Minister of Municipal Affairs in Saskatchewan, at a recent rural municipal convention, "the services rendered to persons have immeasurably increased, without a corresponding increase in personal taxes. As a result real property and especially land is bearing far too great a share of the burden of taxation. Increase in land taxation in the United States, in the average farm real estate tax, was found to have increased from 24 cents per acre in 1913 to 58 cents in 1929, an increase of 141 per cent. After 1929, the average tax fell until in 1932 it stood at 46 cents. I am sure," he added, "that taxation of farm property in this country would show a similar increase if the figures were available."

"If the services rendered by government continue to develop and increase," continued Mr. Smith, "then sources of wealth other than land must be taxed to meet the cost. Unless this is done, our lands will be confiscated through taxation, and we will all become tenants of the State."

Not A Solution

With the continuing growth of demands for more and more social services, debt adjustment will not solve the problem for the land-owning taxpayer. Even after liquidation of present tax indebtedness against land, if this were done on a comprehensive scale, the tax rate would continue to mount to meet the cost of the additional services requested, if they are to be provided.

It is, therefore, quite evident, that there must be a realignment of the incidence of taxation if the municipal taxpayer is to be relieved, and this involves changes in the bases of taxation in all spheres—Federal, Provincial and Municipal.

Espionage In Britain

Espionage in Great Britain has increased in recent months, the London Star said under a banner line reading: Spies Pouring into Britain. The Star said spies had been swarming into Great Britain from all parts of the world since rearmament started. It said that sabotage of aircraft factories causes extension of counter-espionage and that the number of spies in Great Britain had doubled.

The statue of the Venus de Milo is a little more than six feet three inches.

WAKE UP LIKE A CAVE MAN

Feel Full of Life—No More Tired, Dull, Heavy Mornings

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "rotten" your liver is out of order. Your liver clears the blood of poisons, separates the nourishing part of your food from the waste. Supplies energy to muscles, tissues and glands—gives out bile, the body's laxative, helps stomach, kidneys and intestines to work properly. A more bowel movement isn't enough. "Fruit-a-tives" made from fruits and herbs, will strengthen and build up your liver like nothing else will. You'll be amazed how well you are every morning. Try Fruit-a-tives. All druggists.

FRUIT-A-TIVES LIVER TABLETS

Queen Mary Dislikes Jazz

Queen Mary does not like modern dance music. Shortly before she laid the foundation stone of the new St. Heller hospital at Surrey, a program of music for the ceremony was sent for her approval. She intimated that she did not like modern music, and particularly jazz. She said she preferred light opera and Viennese waltzes. She approved a program which included waltzes and a gavotte.

Doctor Is Good Runner

In celebration of his 80th birthday, Dr. George H. Hammond of New York ran four miles. "I could have run a couple of miles more, but I didn't want to tire myself," he said at the finish. For 63 years Dr. Hammond has run three miles thrice a week. It keeps him in fine fettle, he says.

Between 50 and 60 thousand persons depend on fishing for their livelihood in Hull, England's greatest fishing port.

"Is that a pedigree dog?"

"My word, if he only knew his pedigree, he wouldn't look at such people as you and me."

Tobacco gets its name from tobago, an Indian pipe.

HAPPY ROLLING WITH OGDEN'S

If you're looking for a keen partner in rolling-your-own, step out with Ogden's Fine Cut Cigarette Tobacco. Ogden's rolls a happier cigarette—a smoother, cooler, mellower smoke, and wise "roll-your-owners" have proved it. Use the best papers, of course—like "Chantecler" or "Vogue".

Britain's Difficult Position

Calls For Sympathetic Understanding Instead Of Harsh Criticism

It is evident that Britain is not strong enough to protect all her interests and to fulfill all her obligations at one and the same time in the North Atlantic, in continental Europe, in the Mediterranean, and in the Orient. She has three fronts. She is challenged by three formidable adversaries. And she does not have sufficient force to resist them all.

It is probable, therefore, that the hesitating character of British policy arises not out of moral delinquency, as so many Americans are only too ready to believe, but out of the grim necessity to choose either to abandon many of her most important interests altogether or to come to terms with one or perhaps two of the powerful nations that are challenging her.

The British position is in all truth a difficult one, and since we are not prepared to help the British in their difficulties, the least we can do is to give them sympathetic understanding rather than to pass harsh and hasty judgment upon them.—Walter Lippmann, in Detroit Free Press.

SELECTED RECIPES

COFFEE CAKE

Temperature: 400 degrees F. Time: 25 minutes.

- 1½ cups bread flour
- 1 cup "Crown Brand" Corn Syrup
- 1 cup milk
- ½ cup sugar
- 2 teaspoons baking powder
- ½ teaspoon salt
- 1 cup shortening
- 1 egg

Sift together the flour, sugar, baking powder and salt. Cut in the shortening with a dough blender. Beat the egg until light, then add the milk and the "Crown Brand" Corn Syrup. Add to the flour mixture and stir just as little as possible. Pat into a nine-inch cake pan which has been greased with Mazola. Spread the top with melted butter and then sprinkle on lightly the following mixture:

- 2 tablespoons butter
- 2 tablespoons "Crown Brand" Corn Syrup
- 2 tablespoons Benson's Corn Starch
- ¼ cup cracker or cookie crumbs
- ½ teaspoon cinnamon

This crumb mixture should be well mixed before patting into place on top of the batter. Bake the Coffee Cake in a hot oven and serve hot.

Must Move Quickly

A record total of at least 35,000 tons of freight must be moved "down" north by boat from Waterways, Alta., during the short river season which will open soon, Col. James K. Cornwall, veteran contractor, said in an interview at Edmonton.

A Simple Explanation

Hens cackle after the laying of an egg because their ancestors, the jungle fowls, did it before them, and the jungle fowls did it because, after taking time out for laying eggs, it was necessary for the hens to signal their whereabouts to the rest of the wandering flock.

For Glasgow Exhibition

Robot Portrays Working Of Human Body In Detail

An 11-foot robot that will show the working of the human body will be exhibited at the Glasgow Empire Exhibition in May.

The robot torso is made in half-section. Every bodily process is translated into machinery. The heart is a pump at work; the eye is a camera. The torso breathes.

Food can be seen passing from mouth into stomach, and from the stomach through the processes of digestion until food products are delivered to the blood stream. Food is represented by colored balls such as conjurors use—red for meat, yellow for fats and white for carbohydrates.

Sections of the robot's brain light up with words or symbols to illustrate its workings. "I love" shows the seat of the emotions; "I will" the seat of will power. Notes of music illustrate creative imagination, and a bookshelf how memory stores impressions.

Dials in the brain record heartbeats, breathing and body temperature. At a signal from the nerve centre in the brain a light flashes in the shoulder and muscles represented by cog wheels start to move.

The creator of the robot is Richard Huws, a Welsh naval architect. He is working night and day to finish his mechanical man, which will be worked by a small electric motor.

Has Good Memory

Smallest Quint Did Not Forget Seeing Horse Watered

Little Marie Dionne provided the Dafoe nursery with a mystery that drew more attention than the battle between her father Oliva and her guardians for possession of the quintlets.

Marie hatched the mystery by attempting to water wooden hobby horses with a beach pail.

That act would be ordinary for another youngster but it was extraordinary for a quint because no one could imagine where Marie, who has never been out of the Dafoe nursery grounds since she was two months old, had seen a horse, much less the watering of one.

Leafing through the quint's picture books brought no explanation to their teacher, Nora Rouselle, or their nurses, Sigrid Ulrichson and Molly O'Shaughnessy. Finally they called in Dr. Dafoe and he cleared up the mystery. A year ago a teamster was employed on gardening work around the nursery and sometimes watered his horse within sight of the quint's playroom.

Little Marie remembered and, after filling her beach pail with water, went from one to another of the five hobby horses offering them a drink. She didn't seem at all disappointed that they didn't co-operate by taking it. She kissed them all.

Home Of Lord Lister

Many Visit Place Where Discoverer Of Antiseptics Was Born

Lord Lister, who, by his discoveries in antiseptics "saved more lives than all the wars in all the ages threw away" (to quote the late Lord Moynihan) is buried in the Hampstead cemetery, Fortune Green Road, London. John Weir, chairman of St. Mary's Hospital in Plaistow, tells the following story: "Lord Lister was born in a house in Upton lane, West Ham, which is now St. Peter's Vicarage. Visitors are always calling there to see and almost worship in the room where he first saw the light of day. Recently a Canadian doctor stood for half an hour in silent tribute in that room. Some years ago the vicar's youngest son dreamed that he saw a kindly old gentleman by his bedside in that room. 'God bless you,' said the old man. 'I was born in this room and when you grow up you will be a doctor, too.' The boy told his father that he never felt afraid and added, 'And I will be a doctor.' That boy is shortly entering a London hospital as a student."

Foreman: "Wot's up, Bill, 'urt yourself?"

Bill: "No, gotta nail in me boot." Foreman: "Why doncher take it out, then?"

Bill: "Wot! In me dinner hour?"

A man has bitten a dog, and another has chased a wolf, but we still have to hear of a debtor chasing a creditor.

IF I COULD ONLY GET AN UNBROKEN NIGHT'S REST!

Up time and again because of kidney and bladder weakness? Head nature's warning! Your system may be clogged with poisonous wastes. Take Gin Pills to soothe and tone up the kidneys—enjoy unbroken rest—see how much better you feel.

"Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Rust Resistant Wheat

Claim That Apex And Coronation Not Closely Related

Some confusion about the status of the two rust-resistant wheats, Apex and Coronation, has been reported in one section of the province, according to Professor J. B. Harrington of the University of Saskatchewan field husbandry department.

"The relationship between these two varieties is very remote," Prof. Harrington explained. Apex, the variety produced at the University of Saskatchewan, would be graded on the same basis as Marquis, whereas the milling and baking qualities of Coronation prevented Coronation being graded in the top grades of hard red spring wheat.

Apex wheat was developed from the crossing of H-44 X double cross with Marquis, whereas Coronation was produced at one of the federal experimental stations by crossing Hope with Reward, Professor Harrington explained.

Rumor that Apex and Coronation were closely related, heard in the Battleford district recently, was nailed by the wheat expert. He said that the report of the cereal variety committee on best grains to be grown in Saskatchewan could be obtained from the extension department of the university. Apex had been recommended in many districts, Professor Harrington stated.

A World's Record

Australians Harvest 3,300 Bushels Of Wheat In A Day

A world's harvesting record has just been made by three men on a crop of 700 acres in the Wimmera wheat belt of Victoria, Australia.

Using a modern "auto-header" which strips the heads of grain and bags them in one operation, they harvested 3,300 bushels in one day. They began at 5:45 a.m. and finished at 8:45 p.m. For hurried meals the crew dropped from the machine singly, and the driver not at all. The machine was stopped only at intervals for removing the bagged grain and for oiling parts of the mechanism. The yield of wheat was 43½ bushels to the acre.

Pact With Ulster

New Financial Arrangements Made With Great Britain

Viscount Craigavon, prime minister of Northern Ireland, announced new financial arrangements with Great Britain intended to offset Northern Ireland's losses under the treaty between Britain and Ireland.

Lord Craigavon said Northern Ireland would receive substantial British armament orders, benefits under British agricultural subsidies, and unemployment insurance. He said there also would be general financial arrangements between the London and Belfast exchequers.

Losses Estates In Austria

Baron Alfons Rothschild lost three big estates in proceedings before a court in Faming, Lower Austria. The baron is reported to have fled the country. The court held the estates had "become property of the Reich to repair damages Rothschild inflicted on the former Austrian state treasury."

Mrs. A.—Oh, did I tell you my husband bought me a new car? Friend—But, my dear, I didn't know you could drive.

Mrs. A.—Well, I drove him into buying it.

Railways of Italy carried nearly 100,000,000 passengers last year.

To Investigate Factors Responsible for Fluctuations in Fur Bearing Animals

Widespread investigation of Canada's fur-bearing animals to determine the factors which are responsible for the violent fluctuations in population of wild life is being undertaken by the department of mines and resources, Ottawa. The department is working in co-operation with Charles Elton of the bureau of animal population at Oxford University, England.

Primary objective of the survey will be to determine the cause of fur cycles in Canada and to enable those in charge of the work to forecast the population of the various fur-bearing animals at regular intervals.

Importance of this survey is easily recognized when one realizes the great number of Canadians whose livelihood depends on wild life resources.

According to the C.S.T.A. Review, published by the Canadian Society of Technical Agriculturists, the enquiry will take the form of an annual questionnaire circulated to resident trappers and to the Royal Canadian Mounted Police and other departments in the Northwest Territories.

Those questioned will be expected to give information in their respective districts on the status of caribou, fox, lemming, rabbit, snowy owl and sledge dogs, all of which are subject to violent fluctuation in number. It is believed that the latter are subject to influences similar to those which have the effect of controlling the wolf population, the C.S.T.A. publication states.

Shortages of fur-bearing animals often cause hardship among trappers and particularly natives whose main living comes from game. All animals are not affected by low cycles at the same time. For instance, it is reported there is a shortage of fox, mink and beaver in many localities this year. On the other hand, the muskrat population, which was at a low ebb a couple of years ago, is now so high that the department has issued a special order permitting natives to trap rats six weeks in advance of the normal trapping season.

It is believed this special order will relieve possible distress among the native population on account of the scarcity of other furs.

Position Of The Crown

What It Now Occupies In The Development Of Commonwealth

Seeing how pivotal a position the Crown now occupies in the development of the British Commonwealth, there was a happy fitness in the presentation which was made to Their Majesties, on behalf of the Prime Ministers of the four Dominions, of Mr. Frank O. Salisbury's painting of the Coronation ceremony.

In the letter to the King and Queen which the High Commissioner for Canada read at the Buckingham Palace ceremony the earnest hope was expressed that "this memento of an event which was one of deep significance and happiness may serve as a symbol of the abiding loyalty and affection of Your Majesty's peoples of the Dominion."

The King is sending a personal letter of thanks to Mr. Mackenzie King and the other Dominion Ministers, and we still cherish the hope that he and the Queen may ere long find it possible to make a renewed acquaintance with the Canadian people. — Canada's Weekly (London).

Experiment In Publicity

Canadian Flour Is To Be Advertised In British Isles

Western Canada wheat interests are promoting a campaign of advertising for Canadian flour in the British Isles, where there is a population of about 50 million. A slight increase in the amount of bread consumed by the average family would mean a substantial addition to the quantity of wheat from Canada to manufacture the new brands of bread. The experiment in publicity is likely to be justified by the results.

The woman who drives from the back seat of a car, says a cynic, is no worse than the man who cooks from the dining room table.

Just Waiting

A Time When Patience May Achieve More Than Force

Lauded in half a score of proverbs, patience takes its place among the virtues. Nevertheless it is seldom voluntarily put into practice. "Standing pat" meets with scant favor outside a card game. The human urge is to get busy—do something, do almost anything—rather than be cut off from action. The onlooker's role may commend itself to a few, but wistful waiting has little lure for the majority.

The average man wants a share in affairs, a voice in making the rules by which he must abide. It may be true that "they also serve who only stand and wait," but it is an experience few prefer to a struggle in the arena.

Stepping forward—not standing still—seems the natural impulse. When circumstance calls a halt, enforces a prolonged bivouac, the result is never calm, but always restlessness. And yet, as life is designed, there must be some marking time—periods in which impatience must be curbed, and destiny awaited because it is the wise course. But only the lazy minded accept "what will be, will be," as a personal or national slogan. To the alert it is no rallying cry. The general instinct is to get into the game, whether played with cards or countries, for world wide stakes or small ones, for self glorification or to protect a victim of a tricky player dealing from a marked deck.

Uncertainty rather than reality puts the wind up. Nervous anticipation beclouds wise judgment. Imagination turns possibilities into probabilities. Common sense and patience are panic preventives. If memory serves it was Edmund Burke who said, "Our patience will achieve more than our force." That may be as true to-day as when uttered long ago. Like balm to a wound, it brings solace in this period of a world's watchful waiting for the next development in international politics and policies. — Ottawa Journal.

He Stole Ten Pianos

Wholesale Robbery Of Musical Instruments In London

"Nine upright pianos and a baby grand" have been stolen from the premises of a haulage contractor in London and a member of the firm is reported as having said, "We think it was the work of somebody familiar with the business."

And, when all is said and done, it does hardly sound like the result of a passing temptation arising with irresistible force in the bosom of an otherwise honest citizen. Not many people are moved to steal just one piano on the spur of the moment; to make off with ten of them, nine upright and one baby grand, is a bit too much to be put down to kleptomania or sudden impulse.

Still, the man who stole the whole ten, sounds a promising subject for psychological treatment. The first question that the professors might put to him would be whether music runs in his family.

Training Of Leaders

Scarcity Of Men In Canada To Hold High Positions

The scarcity of men looked upon by the public as qualified to fill the shoes of Leader Bennett may be due to what The Ottawa Journal calls delay in a step that Canada must take ultimately: the step of training the best of its young men for government, for public life, as is done in Britain and other leading countries, the United States being an exception. Men in Britain devote their whole lives to a study of the problems of government. And where can you find better government? — St. Thomas Times-Journal.

In Siberia, there are rivers that freeze solid all winter, releasing the still living fish in the spring.

More than 150 miles of pipe are included in the Boulder Dam refrigeration plant.

A Real Companion

Cat Was Most Satisfying Partner To Itinerant Miner

People generally think of cats as being essentially house pets, not caring to roam about except within the neighboring alleys at dead of night, only to return in the morning and sleep all day on the most comfortable cushion in the house, says Doris I. Bateman, in Our Dumb Animals. But did you ever hear of the cat who travelled in the desert with their roving masters, the miners? The following story was told to me by an old-time miner who is still living in the Panamint Mountains which form the western boundary of Death Valley.

Many years ago when gold and silver mining was much more active than it is now, miners used to travel from one mine to another, doing a little work at each one, in order to hold their claims. Each miner owned his burro pack, however small, to transport his "grub" and his few belongings. But the real companion on the long trips between mines, was old "Tom," the cat. He was a most satisfying partner, because he always agreed to whatever was said—and never talked back. Moreover, he was a true partner in that he kept the mice and rats from molesting the flour and bacon. As an added service he would often curl up at the feet of his master, on cold nights, proving he could also be a most effective foot-warmer. His meager pay was perfectly satisfactory—a can of condensed milk. Of course, with whatever mice or rats he caught, he had no real need of other food.

Somehow Tom always knew when it was nearing time to start on the trail again. All business of catching mice was laid aside, as he sat solemnly to one side, waiting for the last burro to be strapped. Then would come the final words, "All right, pardner!" At once he would leap to the back of his favorite burro, and sprawl flat on his stomach on top of the pack. As the burro went jogging along the trail Tom would often have to dig his claws in hard, while contentedly admiring the slowly passing scenery.

Even to-day one might occasionally come across one of the "old timers" on the trail, with Tom, his "pardner," riding one of the burros, where he patiently listens to his master's stories, and flourishes his tail or flicks an ear, as his only comment.

Health And Intelligence

Perfectly Well Child Likely To Get Along At School

The Board of Education of New York City has just completed a study of school children which shows a positive correlation between good health and intelligence. The bright child, it is shown, is more often the child in good health. The report also points out that school failures or retardation in the child's maladjustment is a measure of the school's failure to understand the child's problems and his needs. The I.Q. (intelligence quotient) is considered therefore an inadequate basis on which to organize the teaching system. — Toronto Star.

France Has The World's Greatest Line Of Defence Ready for The Next War

Advertisements Are Read

Grocer Who Did Not Think So Changed His Mind

Here's a good story. The owner of a country weekly in Western Ontario called one day on a local grocer to urge him to change his advertisements regularly. This grocer's advertisement had remained unchanged for months. "What's the use?" asked the grocer. "Nobody reads advertisements. You had better take my advertisement out of your newspaper." But because of some deal, the space had been prepaid for the remainder of the year.

The grocer—a rather profane man—broke out in scorching language about his son, associated with him in his business. "George has ordered a lot of cherries," said George Sr., "and how he is ever going to sell them, I don't know." Then the newspaper man said that he himself would change the copy of the advertisement to make an announcement about the incoming stock of cherries. To this suggestion was made no opposition.

When the newspaper, with the cherry advertisement in it, appeared, George Sr. called up the newspaper man, and in sulphurous language asked the newspaper man what the — was to be done. "I am getting inquiries from everywhere," he said, "about those — cherries. They haven't arrived yet. Your — advertisement is the cause of it all." "But you said that nobody reads advertisements," said the newspaper man. "Aw, h —!" said George Sr., and hung up the phone. — J.C.K., in Marketing.

Dionne Quintuplets

Guardians Wish All The Dionnes To Live Together

Judge J. A. Valin, chairman of the board of guardians of the Dionne quintuplets, said that the board hopes the entire family of Oliva Dionne will one day live on an estate near Callander.

"We dream of this because we want to give the babies the most natural life possible. It is hard, but we are trying. We want parents and children to be together, provided the babies may be placed in contact with others with safety."

Outcome of the plan would depend on the consent of Oliva Dionne and his wife. Nothing would be done without the parents' consent. Judge Valin was unable to estimate how long it would be before the estate plan would be considered actively.

It was the guardians' intention that the seven brothers and sisters of the quintuplets would be given the same educational opportunities as the quints. College and convent tuition would be paid by the guardians.

Wireless At Windsor

Castle Rooms Have Been Wired For Reception On Up-To-Date Lines

Windsor Castle rooms have been wired for wireless reception on most up-to-date lines. Every important room in the ancient castle, including guest bedrooms, reception-rooms, and servants quarters, will soon have push-button radio. This is George VI's personal contribution towards making the castle modern and more homely.

George VI is a keen amateur wireless technician, and he has personally supervised the wireless installation improvements. Recently he has taken over one of the most powerful wireless sets constructed for private use which belonged to the Duke of Windsor. — London Cavalade.

J. E. Gooder - Editor & Manager**The World of Wheat**

By H. G. L. STRANGE

Director, Research Department
Searle Grain Co. Ltd.

The Turgeon Royal Grain Inquiry Commission has now reported after fourteen months investigation and after hearing 262 witnesses. The Commission finds:

That the open Futures Market is the best method of selling Canadian Wheat and of obtaining the highest price for the producer.

That a supervisor should be appointed on the exchange to investigate and report when required.

That the Speculator is necessary, that he is not a burden on the farmer but on the contrary lessens the spread between producer and consumer, and at his own expense, and makes a ready market at all times for the farmers' grain.

That a Compulsory Wheat Board is not advisable.

That Co-operative Marketing Societies should be encouraged but that they should be flexible and voluntary and more on the Australian model and not necessarily of large size.

That there has been in the past too much agitation and talking in connection with the business of co-operative marketing, and that this has created antagonism.

That the stabilization operations of the McFarland Board, while they provided the producers with higher prices, were injurious to the sale of Canadian wheat.

That the Murray Board did not protect speculative "short" interests.

That the present Wheat Board should not be dissolved immediately.

Now that the questions which have been bothering many people for some time finally have been answered by a most competent and disinterested authority, I suggest the time has come to let bygones be bygones, to forget past differences of opinion, and for us all to work harmoniously together to deal with the three serious wheat problems which still must be solved: To reduce the cost of wheat production, to improve the quality of our wheat, to win and to retain the goodwill of the world's buyers.

Let us all pull together with a friendly spirit, then I am sure will those objects be attained, and the farmers' welfare be improved.

Following factors have tended to raise price: France still further devalues the franc -- Crop conditions poor in some European countries -- Substantial decrease indicated in Canadian spring grains acreage -- Algeria and France reported purchasing Canadian Durums -- Report of increased rust damage in Oklahoma -- Netherlands to accumulate emergency grain stocks.

Following factors have tended to lower price: U.S. winter wheat crop officially estimated at 754 million -- Western Canadian seeding makes favorable progress -- Beneficial rains in the U.S. spring wheat belt -- Netherlands increases import tax on wheat, oats, barley and corn.

Items of Interest

Since 1930 Canada's federal treasury has disbursed a total of \$308,742,859 on relief in varied forms, according to the annual report of Harry Hereford, Dominion commissioner of unemployment relief, tabled by Labor Minister Rogers in the House of Commons. Of this amount Ontario has received \$84,755,715, and Quebec \$52,807,404, while Saskatchewan comes third with \$47,581,902. Other provinces have been assisted to the following amounts: British Columbia \$22,265,975; Manitoba \$21,912,526; Alberta \$15,031,992; Nova Scotia \$7,315,070; New Brunswick \$4,929,890 and Prince Edward Island \$1,190,739.

Banff scenery is on view at the Canadian Pacific exhibit at the Great Empire Exhibition in Glasgow, Scotland. A giant 14 foot enlargement features the scenery of the Alberta Rocky Mountain resort, together with illuminated transparent pictures of semi-streamlined locomotives and modern passenger trains.

The Alberta government is declining to provide a permanent secretary and chauffeur for Lt.-Gov. Bowen, but will provide such service when His Honor is occupied with official duties. Communications to this effect are being sent to Lt.-Gov. Bowen and Prime Minister King, who recently wrote Premier Aherhart asking that the dignities of the vice regal office be maintained. The cabinet's attitude in regard to upkeep of the lieutenant-governor's office is that His Honor will be supplied with office accommodation at the legislative buildings and such supplies and equipment as required. Also, such secretarial assistance as is required for official duties will be provided along with car and chauffeur for official occasions. The cabinet has made no decision with regard to future use of Government House, which was closed May 10th after the legislature voted no further expenditures for Government House should be made by the province.

A. C. RANDALL C. W. ROENISCH
President General Manager**Fighting Game Fish Across Canada****H**OLIDAY opportunities in the thousands of lakes, rivers and streams of Canada afford fishing opportunities which are unexcelled anywhere in the world. The wide stretches of the Dominion are liberally supplied with forest and lake-land, abounding with game fish and animals, where lovers of the great outdoors can find a sports district to suit their every whim. Fishing conditions are so varied in Canada and the species of game fish so numerous that a small booklet is required merely to list all the fish and regulations of the different sections. Deep-sea fishing is found on both ocean coasts, for half-ton tuna off Nova Scotia and equally large sharks near Vancouver Island; five-pound small-mouth black bass at the Devil's Gap Camp, Lake of the Woods district, and in hundreds of lakes in Eastern Canada, vie for popularity with 40-pound muskies at such favored resorts as the French River Camp in Ontario; fighting trout of several species are found everywhere in Canada, most popular regions among anglers being the Laurentian Mountains, north of Montreal, or the mile-high lakes surrounding Banff and Lake Louise in the Canadian Rockies; and mighty salmon bring joy to the hearts of anglers in the Maritimes. These few highlights of Canada's many fishing opportunities illustrate why Canadian sportsmen fishing in their home waters are joined every year by so many thousand anglers from the United States and overseas. Conditions, possibilities and regulations vary so widely in different sections that anglers planning to visit strange districts would do well to find out all about them in advance from A. O. Seymour, general tourist agent, Canadian Pacific Railway, Montreal, or from fishing booklets obtainable at all Canadian Pacific offices.

Alberta Crop Report.

Issued by the Alberta Department
of Agriculture

MAY 13th.—Owing to late snow-storms and heavy spring floods in all of the province (except west of Edmonton and the Peace River district), seeding in Alberta commenced later than usual this year. Cool weather and subsequent rains also retarded its progress. Throughout this large area only about 60 per cent of the wheat crop is now seeded and about 10 per cent of the coarse grains. The eastern portion of this area has been most delayed, while Lethbridge, Calgary, Red Deer, Edmonton, Athabasca and St. Paul report 75 to 90 per cent of wheat seeded. Throughout this area moisture conditions are generally more favorable than they have been for many years. The weather has remained cool and normal growth of cereal crops has been somewhat retarded. Most points report early sown wheat up but requiring warmth to stimulate growth. Districts west of Edmonton to Athabasca and the Peace River area report no considerable reserve of subsoil moisture, and some report the soil as quite dry. However, in most cases there is ample surface moisture for germination, but further moisture and warmth is required for satisfactory growth.

Throughout the province the weather has been cool and growth early. The windstorm of May 12th caused some soil drifting damage on dry, loose and light soils. However, in areas where drifting has been most common, to date no widespread damage has been reported.

The eastern and south-eastern part of the province has been unusually favored with copious precipitation, building up a fair moisture reserve in the subsoil, but it is not safe to assume that a big crop is assured without more moisture in June and favorable weather conditions in July.

Winter crops came through in excellent condition. Alfalfa, clovers, fall rye are progressing favorably. Good hay and pastures are in prospect. There is marked evidence of increased interest in seeding down to forage crops this year in central and northern areas.

Preparations are made for adequate control of grasshoppers in districts where egg-laying was observed last fall. The hatch has been delayed by prevailing damp cool weather.

From a livestock point of view the winter in a large portion of the province was more acceptable than has been the case for the past two or three years. In most areas stock came through the winter in fair condition with but small losses. In a portion of the central part of the south-east corner of the province cool winter conditions created an unusually hard stock season and in this area the stock appears to be in rather thin condition.

Lambing appears to have been accompanied by smaller losses than usual, with the major loss of the period being due to one or two unusually severe blizzards during lambing time. Sheepmen suffered some losses in their grown flocks due to these same blizzards.

In spite of cool weather, ample moisture over the range lands of the south has brought the grass along fairly well and the range stock which were generally in low condition in the spring are now improving and thriving on the new grass.

The brighter prospects in most areas of the province for crops this year is leading to a slight increase in interest being shown in hogs. Livestock markets can only be termed as fair, with about normal run of stock at the present time.

Some relief feed continues to move to last year's drought districts for work horses through the spring work period. Seed grain has been supplied to drought area farmers under the usual regulations.

NOTICE

The books of the Didsbury Health Society will be closed on Friday, May 20th. Members are requested to pay their dues on or before that date.

All dues are payable to the secretary, H. Roberts.

**Purchase of Property
For North Highway Route**

Citizens of Olds were jubilant on Tuesday afternoon (last week) when it became definitely known that the new highway would follow alongside the railway on the east side of the C.P.R. right-of-way from Bowden to Olds and south past the Olds School of Agriculture. The only change in the highway as far as Olds is concerned is that you will travel straight north from the Mushroom Service Station corner instead of going east as at the present time.

Just where the highway is to be built south of here is more than we have been able to find out at the present time.

The purchasing agent for the Department of Public Works visited the farm of T. H. Noad on Tuesday afternoon and signed an agreement for the purchase of the right-of-way through his farm. Mr. Noad brought the good news to town and business people were especially happy, as there has been considerable doubt as to the location of the highway since the survey was made a year ago. At that time the highway was to be built three miles east of town.—Olds Gazette.

**DON'T OVER-RATE
YOUR BANKER**

He cannot perform Miracles

★ ★

There would be more banks than grocery stores all over Canada if banks could perform the miracle of "creating" the means of payment out of nothing.

It is easy to confuse these two things:

- (a) The business of commercial banking, and
- (b) Control of a nation's monetary system.

Commercial banking has to do with the safe-keeping and lending of money and credit.

Control of a monetary system is a matter of national, governmental policy.

Chartered banks finance production and commerce.

Monetary policy in any country is a matter for the national government itself, either directly, or through a central bank.

The Dominion Parliament established Canada's central bank in 1934—the Bank of Canada. Its purpose was declared by Parliament in the very first paragraph of the Act of Incorporation, as follows:

"To regulate credit and currency in the best interests of the economic life of the nation, to control and protect the external value of the national monetary unit and to mitigate by its influence fluctuations in the general level of production, trade, prices and employment so far as may be possible within the scope of monetary action, and generally to promote the economic and financial welfare of the Dominion."

It is for governments alone to determine a nation's monetary policy. Differing conditions of debt and trade may make what is wise for one country unwise for another.

Printing "tickets"—as currency has been called in some sections—entirely out of step with production would make everything you buy cost you more. A Canadian woman living in Germany during that country's inflation in 1923 had to pay 65,000,000 marks for an overcoat, and later 1,000,000,000 marks for a postage stamp! The business of commercial banking is something to be considered by itself, apart from central banking.

A commercial bank takes deposits. There are two kinds of them. For convenience, call them "savings" and "current". Say you are a workman, or a farmer. After you've paid your living costs out of your wage, or out of the proceeds of your crop, you have some dollars left over. Because you do not want to spend them at once you deposit them in a savings account.

That is a savings deposit. As distinguished from this is the "current" account. Say you are a merchant. You have expenses to meet day by day and therefore always carry a balance in an account against which you issue cheques for your business needs.

That is a current account. Let us say you have \$100 in that account and you need \$1,000 to meet some bills. You borrow it from the bank.

You give the manager your note and he places \$1,000 to your credit as a deposit in your

current account. Immediately your balance goes up to \$1,100—\$1,000 of it being derived directly from a loan.

It is unlike a savings deposit in this respect: You intend to spend it at once. You immediately issue cheques against it. You borrowed the money for business purposes, prepared to pay interest because the transaction was a profitable one to you. Soon most of the thousand has been paid out.

For most of the rest of the term of the loan your deposit is at its lowest. Then, before your note is due, you gather money to repay. Up goes your deposit to its peak again.

Then you repay. Your deposit abruptly drops back to say your original \$100—plus the profit you have made, by the use of the borrowed money.

No matter whether bank deposits are savings or current, your bank must keep on hand cash reserves adequate to meet any demands from day to day.

When its loans are increased, not only is more cash paid out—as was the case with your \$1,000 loan; but your bank's cash reserves also become lower in proportion to total deposits.

A bank must not unduly expand its lending operations, for then its cash will fall below the proportion which experience has shown to be necessary to meet the day-to-day demands of depositors. This very fact serves as an automatic check against excessive lending.

Your bank cannot know just when you will walk in to withdraw your deposit—but it must be ready to pay you, in full, in cash, when you do turn up.

**THE CHARTERED BANKS
OF CANADA**

Your local branch bank manager will be glad to talk banking with you. He will be glad to answer your questions from the standpoint of his own experience. The next article in this series will appear in this newspaper. Watch for it.

WORLD HAPPENINGS BRIEFLY TOLD

Surgeon Vice-Admiral Sir Robert Hill, in charge of all medical activities at the battle of Jutland, died at Henley, at the age of 72.

W. H. Wallane, Alberta game commissioner, announced \$7,000 had been paid in 1937 as bounties for destruction of wolves, cougars, crows, magpies and gophers.

M. C. Green, Labor member in the South African Assembly, deplored the fact members were supplied with German-made pencils. He refused to use them.

Two sisters of the famed Dionne quintuplets have gone to Quebec to enter the old convent of the Ursuline Sisters as pupils, the Roman Catholic institution's sister superior said.

The American legation and the Canadian government have discussed construction of a highway through British Columbia, linking Alaska with the United States, it was announced.

Encouraged by a bumper crop of grain last year—122,400,000 tons—the Moscow authorities have reduced the grain area for 1938 but will increase the area for hay and forage crops.

Picking Up Strangers

Risky Business For Motorists Although Some Are Honest

When will people learn to leave roadside "thumb-riders" safely and securely on the side of the road, where they belong?

Seldom a day passes that there is not a story in the newspapers about some motorist being attacked and robbed by one or more men to whom he has given a ride.

There are two classes of "thumb-riders": the man who has no money, and the man who has money with which to pay his bus or railway fare but prefers to save it and "cadge" a ride from some passing autoist.

In the first group there are, undoubtedly, many honest young men who are deeply appreciative of a lift from a passing motorist. On the other hand, there are a lot of men seeking rides on our highways today for the sole purpose of robbery. Is it, then, wise to take a chance?

Picking up hitch-hikers indiscriminately is a risky business and often results disastrously. Kingston Whig-Standard.

A Good Family Game

Easy To Play And Teaches Every One To Be Observant

This is a good game for the family, since small children can play it as well as older ones:

One person starts by asking another a question about something in the room, always beginning with the words, "Without looking." And the person must answer without looking. For example: "Without looking are there any trees in that picture?"

A prompt "No" would prove wrong. Then the loser must try again and again until he gives a correct answer before he may ask the questions.

"Without looking, how many buttons on your clothes?" might catch even you! Things long familiar will yield surprising facts.

Played with children away from home, this game teaches them to be observant and accurate, and will provide a quiet hour as well as good fun.

Will Make Second Attempt

Sir Hubert Wilkins Anxious To Cross Pole In Submarine

Sir Hubert Wilkins, noted polar explorer, said that he would make his second attempt to cross the North Pole in a submarine in the spring of 1939. "I expect the polar crossing to take three months after we reach Spitzbergen," he said. "Later we will set up a permanent weather observation base under the ice between Wrangel Island and British Prince Patrick Island." Mechanical trouble and a delayed start prevented Wilkins from reaching the Pole on his first submarine trip in 1931.

Approximately 191,000 dry oil wells have been drilled in the United States. 2252

FLIN FLON

"The Story of Its Finding and Position To-day"

By PRATT KUHN

In writing these stories of Flin Flon there are naturally many people I should have mentioned, and one in particular now comes to mind.

It is "Hendy"—who officially is W. R. Henderson, the postmaster of the town, and the unofficial poet of the north country. Born in Leeds, Yorkshire, but migrated to Edinburgh, Scotland, at the age of 12 months, thus starting a travel career only satisfied by tripping twice around the world and going as close to the North and South Poles as comfortable.

"Hendy" pioneered gold in Nevada, oil in California, rubber in the Malay States and copper in Manitoba. Then pining for some real fresh air he went north to Herb Lake in 1924, and became Postmaster—visited Flin Flon in 1926 and moved up at once. First he acted as postmaster with the Hudson Bay Mining & Smelting Co., then with the Government post office.

Now he's got a nice new up-to-date office and we publish a picture of it and of "Hendy" himself who is a very stalwart youngster, indeed, and has grown a lot since he left Scotland.

Of course he couldn't be contented with only one job so he organized the "Canadian Reg'lar Fellers Club" and then got winter dog racing going for a handsome shield, donated by yes, you guessed it, "Hendy" himself.

Well, both the dog racing and the Reg'lar Fellers Club started in 1931, so it's a toss-up which came first.

However, I feel the story of the Reg'lar Fellers Club is vitally important so that will be the next "order of business"—particularly as I'm an honorary member of Flin Flon Lodge No. 1—and proud of it.

There were lots of clubs in Flin Flon doing excellent work—the Tuxis, Trail Rangers and Boy Scouts, run respectively under the United, Anglican and Roman Catholic churches, but as Juvenile Judge and Police Magistrate, "Hendy" wondered why there were so few members.

Enquiry showed, however, that many boys who chummed together during the day, but who belonged to different churches were not allowed to join the same club, so joined none. This pointed the need for an absolutely undenominational and non-political grouping and the Reg'lar Fellers was the result.

"Hendy" had been connected with boy's work all his life, so made the ideal individual for the organizing job as it is a fact that little success is achieved in such organizations unless some individual makes it his hobby.

The name, Reg'lar Fellers, appeals to all boys because whether they're Scouts or Rangers or what not, they all want to be Reg'lar Fellers.

As soon as the new club was announced there was a flood of applications to join. During the winters once a week meetings were held with educational talks and lots of games, while in summer, baseball and other outdoor sports were indulged in. Hikes—with hot cocoa at the end of them—were another favorite winter sport.

In 1934, Lodge No. 2 opened at Cranberry Portage, Man., and in 1935

"Hendy", the poet of the north country and founder of Canadian Reg'lar Fellers, is really W. R. Henderson, postmaster.

Herb Lake, Man., was visited by airplane and No. 3 Lodge formed.

The fees to the boys are kept low—25c a year—and each is given his "Obligation" and Badge. Then each summer a Tag Day is held by permission of the Municipal council, which receives the hearty support of all citizens.

Each winter a dog race for the junior championship of the world and the "Hendy" Shield is run under the auspices of the Reg'lar Fellers—drawing crowds of thousands—then a concert is given at night attended by 600 to 700, which supplies further funds to the club.

The race itself is a 912-mile run from Flin Flon to the Mandy mine and return, and the event was started after The Pas discontinued its famous Dog Derby, which was one of the classic sporting events of the world. So well are the teams matched that the race has never been won by more than a few yards and on two occasions by only a few feet. Contestants are boys and girls under 16 years of age.

Here's a very important thing about the Reg'lar Fellers management—and if you've ever been connected with such efforts to help the other fellow you'll know how vital this is—every donation received is acknowledged in the local papers and placed in the bank, while all accounts are paid by checks signed jointly by the president and the secretary.

The boys go to camp each year for two weeks and pay only \$5.00, which covers everything—any extra expense being met out of the general funds. Special arrangements are made for special cases so no boys will be left out of the pleasures of camp—and you can see they are very real pleasures by the pictures accompanying this story.

As I read over this part of my story it's so much "Hendy" that I'll give you one of his poems from "Hendy's" Northern Spasms to wind up my offering this week.

DAY DREAMS

Flin Flon, Man., 1928

I'm sitting alone in the northland
Dreaming of tropical climes,
Where I numbered my friends by the
hundred
And I lived through some wonderful
times.

To Port Said, and Aden, and Malta,
To Hong Kong, Penang and Peru,
My thoughts fly away on the ether
As I vision the boys that I knew.

There's "Mac" far away out in China
Who always met me with a smile,
And the good chums I met in Malaya
Who made life out there worth while.

There's Bill who was my chum in
Chile,
And Archie I knew in Peru;

To have that gang once more around
me,
There's little that I wouldn't do.

They're out in those tropical places,
On the shores of those tropical seas,
And their systems are rotting with
fever
As they pray God to send a cool
breeze.

I've seen all your palms and your
jungles;
I've met the monsoon in its wrath
You can keep them out there, and
just leave me

With Dame Nature, here in the north.

Where the snow and the frost in the
winter

Are a tonic you can't buy with wealth
And the wonderful climate in summer
Assures the great blessing of health.

I'm happy and almost contented,
But when I'm alone, there are times
That my thoughts wander over the
ocean

To my pals in the tropical climes.

Losers Are Plentiful

**Something Over Five Million In
Grand National Sweepstakes**

There were 1,774 winners in the Irish Hospitals Sweepstakes of the Grand National.

But wait, before you rush out to buy a ticket on the next race. There were 5,490,230 losers.

If that takes your breath away, you can get it back with the comforting thought that total receipts were \$13,730,010, and that \$8,657,600 was paid out in prizes.

After all, you might have won. Let's see, 1,774 into 5,492,004 goes—Oh shucks, you do it. Decimals give us a headache.

But you might pin these figures up on the wall as a reminder for next time.—Vancouver Sun.

Happy at the summer camp under careful supervision are the sons of Flin Flon miners.

Even the birds enjoy the summer camp of the Canadian Reg'lar Fellers—a wonderful chance for nature study.

Flin Flon boasts a modern up-to-date Post Office, under Postmaster W. R. Henderson.

1937 start of the Seventh Annual Dog Racing Championship of the world at Flin Flon, Manitoba.

The big thrill. "Hendy" presents the winners of 1937 race with Trophy Shield a "Junior Dog Racing Champion of the world." Bill Kelly won both 1936 and 1937 events and holds a record for the course of 48 minutes 36 4-5 seconds, which is so fast that Shorty Russick and other famous dog mushers have expressed doubts whether they could beat the time.

Burnside Notes

Mr. Fred Metz was a Sunday evening visitor with Mr. B. Woods.

Mr. and Mrs. Howard Pross and Mrs. Wall spent Sunday with Mr. and Mrs. Bert Pross.

Mrs. Joe Davidson and family spent Sunday with Mrs. Otto Bittner.

Mrs. Wall who has just returned from Loyalist, Alberta, has been spending a week with Mrs. Wm. McCulloch.

Lone Pine W.I. will hold their annual picnic Tuesday, May 24th at Lone Pine Hall. There will be baseball games and sports of all kinds in the afternoon and a dance in the evening.

Melvin Notes.

Dance at Melvin on May 24th. Olds Orchestra.

Miss Ruth Johnston is in town this week nursing Mrs. Ed. Ford.

Mrs. Webster visited with Mrs. Charles Youngs during last week.

Mr. and Mrs. H. Friesen were Sunday visitors with Mr. and Mrs. Godfrey Carlson.

Jerry Ward of Middleton, Idaho, and Al. Cook, spent Wednesday with Lloyd Chandler.

Melvin played their first game of baseball in the Bush League on Sunday against Dog Pound. It was an even game up to the 7th, when Melvin broke away and Lawrence Krebs made a home-run, giving Melvin the game with 17 to 5.

Saturday. The cast is studded with more than a score of screen, radio and night club personalities.

The interesting angle to this new Walter Wanger production is that it reproduces the Manhattan night club strip between Fifth and Sixth Avenues on 52nd Street, with the top personalities from the niteries themselves to inject the gay spirit and mad atmosphere of this night life belt into the picture.

The night club entertainers who appear for the first time on the screen in "52nd Street" are Jack White, Rocco & Saulter, Georgie Tappe, Cook & Brown, Jerry Co'onna, Al Norman and the 52nd Street Girls.

This galaxy of talent is augmented by an array of picture stars which includes Kenny Baker, Ian Hunter, Leo Carrillo, Pat Paterson, Sid Silvers, Ella Logan, Zasu Pitts, Dorothy Peterson and others.

LOCAL & GENERAL

Mr. and Mrs. O. W. Stauffer leave today (Thursday) for a visit to Port Elgin, Ontario, and other points.

Miss Evelyn Brooke who for the past year had been in Switzerland, arrived home Monday.

Mr. and Mrs. C. F. Dooley, of Calgary, spent Saturday in town renewing acquaintances.

We have it on good authority that the Olds-Sundre highway which is a secondary highway will be gravelled this year.—Olds Gazette

Mr. N. S. Clarke left on Sunday for Ottawa where he will appear before the Tariff Commission in the interests of the dairy industry.

A meeting of the Didsbury Dairy Calf Club will be held at Carlton Leeson's farm west of town Saturday, May 21st at 2 p.m.

Mrs. W. O. Hieland of Hollyburn West, Vancouver, B.C., is spending a few days with her sister, Mrs. Erven Rodney.

Edward Brooke who had been taking the engineering course at the University of Alberta, returned home for the summer vacation Friday.

Mrs. George F. Smith announces the engagement of her elder daughter, Lucille H., to Mr. Milton H. C. Ford, of Carstairs. The marriage will take place in June.

Mr. and Mrs. Ed. Liesemer, Wilma and Lorne motored to Edmonton last week to visit Mr. Leonard Hoare who is a patient at the University Hospital.

A. Melville Anderson, Optometrist and Optician, 224 8th Ave.-W., Calgary, will be at the Rosebud Hotel on Monday afternoon only, May 23. Eyes examined and glasses fitted.

Roman Holub who is an engineering student at the University of Alberta, left last week for the east where he will be employed for the summer.

Swing out this Friday and Saturday on Walter Wanger's nifty swifty "52nd Street" at the Opera House. Get set for a joyride down Swing Alley. A story with rhythm!

Mrs. George Liesemer spent the weekend at Edmonton visiting her daughter, Mrs. Jack Pearson, who recently underwent an operation in an Edmonton hospital.

Amateur Night at the Community Hall under auspices of the Mt. View Women's Institute, Friday, May 20. Adults 35c, children 15c, family ticket \$1.

Margaret Adshead and Dorothy Buhr won 1st prize in the Grades 5 and 6 duet section at the Olds Musical Festival. This item was inadvertently missed out of the festival report appearing last week.

3 One-Act Plays presented by Olds young people will be given under the auspices of the Junior Ladies' Aid of the United Church in Church auditorium tonight (Thursday) at 8:15.

The Violet Tag Day which is sponsored by the I.O.D.E. will be held this Saturday, May 21st. The funds derived from this tag day are always used for supplies and upkeep of the nursery at the Didsbury Hospital.

Electioneering In Saskatchewan

Premier Aberhart, leader of the Western Canada Social Credit Association, was accompanied on his speaking tour of Saskatchewan this week by G. L. MacLachlan, M.L.A., chairman of Alberta Social Credit Board.

The premier and board chief opened their schedule of meetings when they spoke at Lloydminster on Monday night. For the remainder of the week until Friday, inclusive, they will address two meetings daily in different ridings.

It is reported that Hon. E. C. Manning, provincial secretary; Hon. S. E. Low, provincial treasurer; Hon. Lucien Maynard, minister of municipal affairs; G. L. MacLachlan, chairman of the Social Credit board; A. J. Hooke, a member of the Social Credit board, and R. E. Analey (S.C.), Leduc, will take part in the election campaign.

The Saskatchewan elections will be held June 8th, which will give three weeks for intensive campaigning.

Announce Dates of Alberta Fairs

Dates of seventeen summer fairs in Alberta have been set, according to an official list issued under the direction of Hon. D. B. Mullen, minister of agriculture.

Class "A"

Calgary, July 11 to 16

Edmonton, July 18 to 23

Class "B"

Lethbridge, July 4, 5 and 6

Red Deer, July 7, 8 and 9

Camrose not definite July 25 26-27

Vegreville, July 25, 26 and 27

Vermilion, July 28, 29 and 30

Lloydminster, August 1, 2 and 3

Class "C"

Lacombe, July 15 and 16

Bealta, July 19 and 20

Olds, July 22 and 23

Didsbury, July 27

Goose Creek, August 3

Hays, August 5

Westlock, August 12

Priddis and Millarville, August 13

Warapite, August 15

According to a report in the Olds Gazette they are considering re-organizing senior baseball in that town. They are hoping a league can be formed including Didsbury, Innisfail, Bowden, Torrington and Carstairs.

Among those who received the degree of B.Sc. in Agriculture at the convocation of the University of Alberta on Friday last was John Everett Birdsall, of Didsbury. Mrs. Birdsall attended the convocation, returning home Monday.

Mr. C. Rutherford, of the Trades and Industries Branch of the provincial government, conducted an examination in town Monday for automobile mechanics. Among those who took the examination were Carl Brightman, Wendel Gochee, George Hardy, Eric Schweinger, Phil Andrews, W. Wrigglesworth and J. Miller.

NOTICE

A Clean Community acts as a preventative against disease: Each Householder can and should be a guardian of Public Health.

The dread fly, carrier of disease, is again with us.

Every effort should be made to keep your premises fly proof. Burn all garbage, but if you cannot burn it, place in a fly proof container, for regular removal by the scavenger. Have windows and doors properly screened and if the flies get in, swat 'em.

A suggestion re. outside toilets: A pail of old car oil poured in once or twice during the summer will prevent flies gathering. The garages and service stations will, no doubt, be glad to furnish the oil which has been drained from cars, ask them.

Your co-operation in the past is appreciated, give us it again—For a clean town free from disease.
